

1st IDKD Intensive Course in Hong Kong Excellence in Teaching

Diseases of the Brain, Head and Neck, Spine

May 7 – 10, 2011
Hong Kong

In collaboration with The University of Hong Kong
and the Hong Kong College of Radiologists

An Interactive Course in Diagnostic Imaging

IDKD offers interactive, organ-based teaching workshops with annually changing topics.

Concept

IDKD – International Diagnostic Course Davos – is in its 43rd year and has witnessed a great success and constant growth to over 1000 participants. It is based on an excellent and unique teaching concept and a highly qualified International faculty. IDKD offers interactive teaching and is organ-based with annually changing topics: Head & Neck, Spine – Chest & Heart – Abdomen – Musculoskeletal.

IDKD Hong Kong will be run as an intensive course, featuring 14 different workshops, spread over 4 days (Saturday–Tuesday), on imaging of important diseases of the brain, head, neck and spine.

During workshops, participants study and discuss the case material. Teachers then guide the participants through the cases, explain the differential diagnosis, present additional material and ask questions. Teachers can easily be approached during breaks to individually discuss unsolved problems. Participants rotate in groups of approximately 50 students through all the workshops. They can bring their own laptop (PC or Mac) to the workshops for case viewing and will get pdf files of the cases on a USB stick. Moreover, the teachers will present their cases in a video loop on the classroom VCR projector.

In addition to the teaching program “hot topics” in radiology, new developments and overviews including interventional techniques will be discussed in highlight lectures.

Syllabus

The IDKD Syllabus produced for the Davos course is included in the registration fee. It is professionally printed and gives an overview of current imaging of brain, head, neck and spine diseases, on more than 250 pages.

IDKD Online Cases

Participants will receive a login and password allowing online access to more than 80 well-documented teaching cases stored in the IDKD online database.

CME Credits

European CME credits have been applied for and will be announced on the web at www.idkd.org. We expect to obtain approximately 21 CME credit hours.

Exhibition

An exhibition of selected imaging industries will present relevant technical information and expert advice. Meet the representatives of leading companies and discuss recent advances of imaging technology.
